SUMMARY

Backend-focused Software Engineer building scalable systems using Python, Django, and AWS. Currently working on an AI-driven scraping platform with asynchronous processing (Celery) and cloud deployment on AWS. Experienced in improving system performance, designing backend architectures, and handling production workloads.

EXPERIENCE

SMS DataTech

Oct 2024 – Present

Software Engineer (Backend and Cloud)

Tokyo, Japan

- Designed and developed an AI-driven scraping platform using LLM-based modules for automated data extraction workflows across dynamic websites
- Built scalable **asynchronous pipelines** using **Celery** and queue-based task processing for complex workflows
- Improved API performance by **20–30%** through backend redesign and database optimization
- Led backend system redesign including API structure, database schema, and backend architecture
- Containerized services using **Docker** and contributed to deployments on **AWS ECS/Fargate** using **CloudFormation**
- Managed AWS resources including EC2, ECS, S3, CloudWatch, and implemented Auto Scaling and Load Balancers for improved scalability and availability
- Handled **1000+ daily internal requests**, ensuring system reliability and performance for the internal use case.
- Led backend task execution, prioritizing features and coordinating with team members while mentoring interns
- Collaborated with cross-functional teams to define requirements and drive backend improvements through regular technical discussions

SMS DataTech

Jul 2023 – May 2024

Software Engineer Intern

Tokyo, Japan

- Developed backend services using **Django REST Framework** for internal project dashboard (POGO)
- Designed and implemented **REST APIs** and database schemas using **MySQL**
- Built multiple features from scratch, improving internal workflow visibility
- Collaborated with cross-functional teams to deliver production-ready features

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Backend: Django, Django REST Framework, Celery

Cloud: AWS (EC2, S3, ECS, Fargate, CloudWatch, CloudFormation, Monitoring & Operations)

DevOps: Docker, Github actions, Git

Databases: MySQL, MongoDB

Concepts: Distributed Systems, API Design, System Design

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (2025)

[View Credential](#)

AWS Certified SysOps Administrator – Associate (2026)

[View Credential](#)

PROJECTS

BlueStar | *Node.js, Express.js, MongoDB, JavaScript* | Live

- Developed a full-stack service platform for a local startup, supporting features like food ordering, laundry, and bike rentals
- Built REST-based backend using **Node.js** and **Express**, with **MongoDB** for data management and scalable request handling

EDUCATION

Indian Institute of Information Technology (IIIT Nagpur)

Dec 2020 – Jun 2024

B.Tech in Computer Science and Engineering (CGPA: 7.8)

Nagpur, India
